

NIREESH J

9790634524 • nireeshj2k2@gmail.com • in/nireeshj • github.com/ReyRoi • Arakkonam

Summary

Dynamic developer committed to delivering innovative solutions and enhancing user experiences. Proficient in both **front-end** and **back-end** development, with a strong aptitude for rapidly learning new frameworks. Dedicated to collaborating with experienced teams to refine technical skills and drive professional growth in software engineering.

Experience

Kaar Technology

Chennai, India

Intern

06/2024 - 07/2024

- Gained hands-on experience with AngularJS, developing dynamic web applications and enhancing my skills in front-end development.
- Developed a foundational understanding of SAP, focusing on its functionalities and role in enterprise environments.

Freelance

Arakkonam, India

Full Stack Developer

01/2024 - 06/2024

- Created various websites and full stack projects for multiple clients, effectively showcasing their businesses online.
- Designed user-friendly interfaces and robust back-end systems, contributing to their growth by enhancing visibility and accessibility to services.

LearnIfite

Chennai, India

Front End Developer

07/2022 - 08/2022

- Developed a comprehensive website architecture, ensuring an intuitive user experience and user Interface and optimizing rendering time.
- Created visually beautiful and responsive web pages using JavaScript that matched the needs and branding of the organization

Skills

Javascript | **Node.js** | MongoDB | Express.js | **React.js** | HTML | .CSS | C++ | .C | Python | **Java** | Hibernate | Spring
SpringBoot | Mysql | Tailwindcss | Bootstrap | Git | Github | DBMS | **OOPS** | OS | Data Structures | Frontend | Backend |
Full-stack | Windows

Education

RMD Engineering College

B. Tech Major in Information Technology - CGPA - 9.11

08/2020 - 04/2024

Projects

Full-Stack School Website - <https://bgsthimiri.com>

Designed and developed a full-stack website for a large institution using the MERN stack, featuring a responsive user interface and a robust backend. The project, now live, includes a comprehensive dashboard for administrators, enabling efficient data management and real-time insights, significantly boosting their digital presence.

- Tools Used - **React.js Node.js Express.js MongoDB TailwindCSS Postman Github**
- Duration - 3 Months

Food Ordering App - <https://github.com/ReyRoi/Food-Ordering-App.git>

Developed a comprehensive web app for a restaurant's food ordering system, allowing customers to place orders seamlessly while providing staff with a dashboard to manage billing, track active and pending orders, and streamline operations. The app is specifically designed to work exclusively within the restaurant premises, ensuring efficient in-house order management and a smooth dining experience.

- Tools Used - **React.js Node.js Express.js MongoDB TailwindCSS Thunderclient Github**
- Duration - 3 Months

Projects

HandCricket - <https://reyroi.github.io/handcricket>

Built a hand cricket game using JavaScript, implementing complete game logic for player vs computer interactions. The game allows users to select runs with computer-generated responses, and includes features like tracking player scores, randomizing computer choices, and determining the winner based on typical hand cricket rules. The project demonstrates strong problem-solving skills, with a focus on game logic, randomness, and interactive UI development.

- Tools Used - **HTML CSS Javascript**
- Duration - 1 Month

Achievements

District Top In SSLC

Secured the top rank in the district in SSLC, demonstrating strong academic performance and dedication.

Led Softball Team to National

Successfully led the softball team to the national level, showcasing leadership, teamwork, and dedication to achieving excellence in sports.
